

Cleaning Up The Chaos

Simplifying Site and Sponsor Collaboration

Veeva is different. We are the first and only company providing the most complete set of applications that seamlessly work together across sites, patients, and sponsors. All of our technology is built on the same foundation. Imagine capturing information once and having it flow where it needs to go – saving you time, reducing errors, and streamlining the entire process.

Why Choose Veeva?

Consistent Ways of Working

Forget juggling disconnected software and varying processes. Veeva provides a consistent experience across sponsors and studies. Plus, with single sign-on, logging in is a breeze. This means less training time, fewer passwords to remember, and more time focusing on what matters most – patient care.

Proven Track Record in Innovation

Founded in 2007, Veeva has over 18 years of experience delivering cutting-edge technology. We offer a suite of over 55 applications specifically designed for the life sciences industry. In fact, 85% of new drugs approved are launched with Veeva, and more than 100 partners have built integrations to our products. We're also constantly innovating with 3 feature-rich releases each year and our AI partner program to enable our customers for the future.

Here for the Long Haul

Sites currently experience lots of technology companies that are here today and gone tomorrow, focused on solving a specific problem. Research sites need reliable, stable technology partners committed to their long-term success. As a public benefit corporation, we intend to simplify clinical trials by fundamentally improving burdensome processes rather than selling products for short-term gain. Veeva is an essential technology partner to the industry.
