# Veeva SiteVault

## Simple Product Sheet – August 2025

SiteVault unifies site systems in a single cloud solution to simplify management of site operations and studies.

SiteVault seamlessly integrates with sponsor systems to streamline information sharing and speed trials.

- **SiteVault eISF** is the leading investigator site file application used to support compliant and efficient eISF management.

- **SiteVault CTMS** provides end-to-end protocol, financial and participant management capabilities.

- **SiteVault eConsent** is a unified electronic patient consent application that enables onsite and remote digital consent in full compliance with 21 CFR Part 11.

PRODUCT STATUS:

|  | Announced | Status | # Customers |
|---|---|---|---|
| SiteVault eISF | 2018 | Mature | 8600+ |
| SiteVault CTMS | 2025 | Early | 1–10 |
| SiteVault eConsent | 2020 | Mature | 10–50 |

# SiteVault eISF

eISF is the leading investigator site file application used to support compliant and efficient eISF management. It provides site and study document management capabilities for upload, version control, signatures, training and real-time co-authoring with Microsoft Office. It is purpose-built to support digital monitoring and provides site-wide insights into document management actions and priorities
