# Veeva Site Connect

Optimized Site-Sponsor Collaboration

- **Save Time**

- **Increase Quality**

- **Improve Compliance**

Capabilities

Site Connect provides sites with a standard and site-centric hub for collaboration with sponsors and CROs, and a simple, consistent mechanism to exchange study information during startup, execution, and closeout. Site staff are invited to use Site Connect by their trial sponsor or CRO.

Sponsor / CRO → Document Exchange, Safety Letter Distribution, System Links, Study Announcements, Payment Information, Site Profile, End-of-Study Media → Sites

- **Document Exchange:** Streamline information exchange with sponsors and CROs with a single place to receive and exchange start-up packages and regulatory documents. Eliminate redundant work with an automated history of exchange.

- **Safety Letter Distribution**: Simplify the receipt process around safety letters to save time and ensure investigators stay informed.

- **System Links**: Stay organized and easily access study applications with a central list of key links from your sponsor or CRO.

- **Site Profile:** Easily store site staff information and addresses along with roles and responsibilities.

- **Study Announcements**: Stay up to date and eliminate siloed communications and duplicative messages with a single hub for study announcements.

- **Payment Information**: Expedite payment receipt and reconciliation with the ability to see reimbursement data as it is tracked by the sponsor or CRO.

- **Study Contacts**: Access current study contacts sourced and updated directly from the sponsor or CRO's own active directory.

- **End-of-Study Media**: Easily access and file away end of study media files with a few clicks at study closure.

- **SiteVault Connectivity**: Save time and improve quality and compliance in document exchange with an optional, instant connection to Veeva SiteVault.

Additional Benefits

- **Fewer Logins**: Manage fewer usernames and passwords with VeevaID, a single login credential that works across all Veeva site-facing applications, regardless of the sponsor or CRO.

- **Consistent Technology Experience:** Reduce technology overload with a single, consistent experience that doesn't change from one sponsor or CRO to the next.

- **Site Choice**: Sites have the option to access and upload documents directly to Site Connect, seamlessly link Site Connect to their SiteVault or simply exchange documents via email.

- **More Time for Patient Care**: Minimize extraneous emails and duplicative requests, so site staff can spend less time on administrative tasks – and more time with patients.

- **Improved Execution as a Study Team**: Site Connect allows sites to manage their own user access, enabling them to better prioritize and execute on sponsor-driven tasks as a team.

- **Fully Supported by Veeva**: Veeva is committed to the success of sites around the globe. Veeva provides a dedicated global support team for sites, comprehensive training resources, and technical assistance for all customers.
