

Veeva SiteVault CTMS

Overview

SiteVault CTMS streamlines clinical trial management by giving study teams a centralized platform to manage protocols, track participant activity, and oversee study financials from start to finish. From pre-award budgeting and visit scheduling to post-award invoicing and payment reconciliation, SiteVault CTMS supports every phase of a study.

Built on the same platform trusted by 450+ sponsors and CROs, SiteVault CTMS reduces duplicate data entry and managing protocol milestones, saving sites time, effort, and unnecessary costs.

Benefits

Streamline Site Operations

Keep trials on schedule, manage study pipeline and monitor staff workloads and more with one centralized system designed to easily organize and track study details, staff and key milestones.

Study Finances in Focus

Gain clear insight into earned and forecasted study revenue to make informed financial decisions with simple, customizable reports and dashboards.

Eliminate Lost Revenue

Capture and recognize all earned revenue with automated tracking of unbilled activities, unpaid invoices and invoice aging.

Improve Participant Experience

Get real-time visibility into patient status, visit management, and procedure completion to ensure nothing gets missed and every participant has a smooth trial experience.

Minimize Duplicate Data Entry

Save time and reduce manual work with a CTMS that's fully unified with your eISF and eConsent, and designed to connect seamlessly with sponsor and CRO systems, streamlining communication and eliminating duplicate data entry.

Features

Protocol & Milestone Management

Track protocols, amendments, and key milestones in one place to keep studies organized and compliant from start to finish.

Revenue Reconciliation

Quickly compare expected vs. received payments, flag discrepancies, and maintain a clear picture of site financial performance.

Central Schedule of Events

Build and manage a shared schedule of events that automatically flows into visit tracking, invoicing, and reporting.

Customizable Reporting

Eliminate manual spreadsheets with access to real-time dashboards and exportable reports on trial activity, financials, and performance metrics.

Pre-Award Financials

Easily create, revise, and manage multiple budget versions with built-in tools to streamline pre-award financials.

EHR Integration

Connect with your EHR system to reduce duplicate data entry and improve accuracy of patient data.

Participant Visit Tracking

Monitor every patient milestone, visit and procedure in real time to ensure nothing gets missed and timelines stay on track.

Connected to eISF & eConsent

Work more efficiently with a CTMS that's seamlessly connected with your eISF and eConsent, keeping all documentation connected.

Automated Invoicing

Easily identify invoiceable activities generate accurate invoices based on completed visits and contract terms.

Built for Connection to Sponsors and CROs

SiteVault is built on the same platform that powers the clinical operations of over 450 sponsors and CROs to streamline information sharing and speed trials.
